

DO YOUR EMPLOYEES TRAVEL? STAY IN HOTELS?

Bed Bugs Can Happen to Anyone, Anywhere!

With a re-insurgence of bed bugs that hasn't been seen in the U.S. since 1941, these pests, known for being great hitchhikers, are now showing up in offices across the country.

This epidemic reaches everyone regardless of cleanliness or socio-economic status; and is a direct result of an increase in low cost international travel.

These pesky hitchhikers; easily transfer to the workplace on purses, briefcases, clothes, shoes, books and other personal items.

Bed Bugs at Work Create Special Concerns

Privacy or discrimination issues, regarding an employee bringing bed bugs into the workplace.

A perception that the workplace is unhealthy due to the risk of bed bug bites, allergic reactions, or from the perceived health risks from conventional insecticide treatments.

The company being held responsible for creating infestations in employees' homes, by not acting quickly or correctly.

Implementing a proactive bed bug preventative treatment program and utilizing post fumigation best practices will achieve and maintain a bed bug free home and office.
