

WHY HOTELS RELY ON BED BUGS & BEYOND FOR PREVENTION & ELIMINATION OF BED BUGS

Hotel Benefits

Bed Bugs and Beyond® can assist you in creating a custom, comprehensive awareness, prevention and reaction plan to successfully address and combat bed bugs.

All hotels need to have an education, prevention and awareness action plan in place whether they have a history of bed bugs or not, since traveling guests and visitors are the vehicle in the spreading of bed bugs and no lodging facilities are immune from them.

Guest concerns about bed bugs have skyrocketed, a November survey by the American Hotel & Lodging Association (AH&LA), shows that more than half of the respondents reported that guests were increasingly asking about bed bug precautions. Unlike bed bugs, hoteliers have nowhere to hide and need an easy to understand and non-threatening way to deliver accurate information.

Before complaints arise, let Bed Bugs and Beyond® assist you with a proactive plan so you can attack the bed bug challenge while avoiding litigation and negative reviews or publicity. "The more you try to hide information, the worse this is going to be for everybody," said, research entomologist, Jeff White.

We can put a program in place for you so you can openly discuss both your preventative and remediation programs to offset negative reports and demonstrate how responsible and trustworthy your brand is.

Proven Methods: Vikane & Heat

The only two scientifically proven and documented ways to eliminate bed bugs and their eggs in a single treatment are Vikane Fumigation and Heat. Both leave no harmful surface residue, odor or film behind.

Bed Bugs and Beyond can refer you to select highly acclaimed proven service provider from our exclusive network of providers to guarantee elimination with the use of proven and effective treatment methods.

Professional pest control firms and their customers have relied on Vikane® gas fumigant for 50 years to solve the toughest structural pest problems such as dry wood termites, wood-destroying beetles, bed bugs and more.

Heat is also a highly preferred method used in conjunction with Vikane or when containing the entire structure isn't a viable option.

Who is Bed Bugs and Beyond?

Bed Bugs and Beyond Consultants is the nation's first and only trusted, full-service brokerage provider; offering 24/7 services of scientifically documented and validated immediate bed bug elimination, education, counseling and service expertise.

We are not a direct service provider, we are a trusted liaison to our clients; orchestrating proven treatment offerings, using only the nation's leading, licensed, bonded and insured service specialists. We have no bias or personal agenda aside from getting our clients bed bug free and maintaining a bed bug free environment.

Our services include counseling and education along with coordination & orchestration assistance of verified treatment methods; provided by leading licensed providers nationwide, to eliminate bed bugs in a single treatment, guaranteed!

We provide guidance and counseling to obtain reputable service providers including:

- Vikane Fumigation
- K-9 Scent Detection
- Traditional Pest Control Services
- Relocation Services
- Preparation Guidelines
- Best Practices Pre & Post Treatment
