

INCREASE PROFIT MARGINS & MAINTAIN A LOYAL CUSTOMER BASE

PCO Benefits

Vikane Fumigation increases your service offering to customers; it's another tool in your toolbox.

By removing infested contents for fumigation, traditional treatments can be conducted without having to work around infestation and clutter which increases a PCO's success rate in a shorter time frame and reduces human error.

Bed Bugs and Beyond is solely focused on providing fumigation client sales & service support and is not a fumigator or PCO; therefore does not compete in any way with your service offering or clients.

We simply compliment your offering by allowing you the opportunity to maintain & expand your client base, establish new relationships & strengthen your reputation by providing quick & proven bed bug elimination options while maintaining your residual client base.

In situations where an entire structure cannot be 100% contained, vault fumigation of the infested contents used in conjunction with traditional pest control/extermination treatment methods, drastically increases the success rate of eradication in a single treatment. (i.e. apartments, office buildings)

Re-treatment for infested clients is reduced/eliminated to maintain profit margins.

This results in happier, more satisfied, loyal customers to ensure you maintain your positive reputation in the market place.

Who is Bed Bugs and Beyond?

Bed Bugs and Beyond Consultants provide exclusive bed bug elimination sales, brokerage & marketing service to Pest Control Operators & Vikane fumigators across the U.S.

Our partner benefits include: 24/7 customer sales, support, education, counseling, full service fumigation contracting, scheduling, coordination and orchestration of our unique patent pending proven treatment process.

This process includes pre & post treatment best practices and in depth customer education; which has resulted in 100% customer satisfaction.

Achieving complete elimination of all bed bugs & their eggs in a single treatment is key to our offering which includes best practice solutions to combat potential re-infestation.

Vikane Facts

Professional pest control firms and their customers have relied on Vikane® gas fumigant for 50 years to solve the toughest pest problems— drywood termites, wood-destroying beetles, bed bugs and more.

A single treatment of Vikane, when used according to label directions, can eliminate all of the pests. Vikane completely dissipates to leave no surface residue, odor or film behind.

Three facts about Vikane explain its special ability to get rid of bed bugs.

1. Vikane is effective against all life stages of bed bugs, including the eggs.
2. There is no resistance of bed bugs to Vikane.
3. Vikane® gas fumigant penetrates into cracks and crevices, into furniture and any other hiding places, to eliminate the pests.

Vikane fumigation can be used in conjunction with heat or in situations where heat isn't an option for items that may be damaged; PCO's can utilize fumigation and still maintain their current customers.
